The Seattle City Council 2011 Work Program includes the significant issues and projects that the Council expects to review and act upon during 2011. Issues or projects that require significant monitoring by the Council also are listed. The purpose of the Work Program is to identify and balance the workload of the Council and its staff, insofar as that workload may be predicted at this time. The Work Program may be updated as necessary throughout the year.

Work items are organized by the Council committee structure. Following each work item, primary Council staffing responsibility is indicated. "Chair" indicates that the committee chair's personal staff will assume staffing responsibility; "Central" indicates that the Council's Central Staff will assume staffing responsibility. The number in the "days assigned" column is an estimate of the amount of staff time needed for a Central Staff analyst to staff the project. Each committee also has days for "consulting". When the "days assigned" column says "days in consulting", it means the project is not expected to take a full day, and will be included in the days each committee has allotted for consulting.
